SUBJ: RADIOLOGICAL AFFAIRS SUPPORT PROGRAM (RASP)

REF: (a) NSD Guam ltr 600 ser 05/1132 of 5 Aug 88
(b) NAVFACINST 5100.15

1. Reference (a) questioned the requirement to appoint a Radiation Safety Officer and establish a formal radiation safety program, and requested assistance in identifying the specific NRC license under which your command receives, stores, issues, ships uses, transports, and disposes of radioactive material.

2. Specific NRC licenses are no longer issued to individual Navy Commands. The NRC issues a Master Material License to the Department of the Navy. The Navy, in turn, issues Navy Radioactive Material Permits (NRMPs) to appropriate Navy Commands to ensure the safe use of NRC licensed and Naturally Occurring and Accelerator produced Radioactive Material (NARM).

3. NSD Guam operates under the provisions of three separate NRMPs issued to the NAVSUPPSYSCOM authorizing the receipt, storage, shipping, usage, transportation, and disposal of various radioactive materials and commodities.

4. Additionally, your attention is invited to paragraph II.P. of Enclosure (1) of reference (b), which requires all activities possessing ionizing radiation sources to appoint a Radiation Safety Officer and to develop and implement a local radiation safety program.

5. For further information, contact Mr. Roy H. Smith, NAVSEADET RASO, AV 953-4692, Comm (804) 887-4692.
