Subj: FINAL WORK PLAN, CORRECTIVE MEASURES IMPLEMENTATION,
DRMO SALVAGE YARD, SWMU 12

Enclosed is the final work plan explaining Corrective Measures Implementation at the Defense Reutilization Marketing Office (DRMO) Salvage Yard, Apra Harbor, Guam. This project will remove PCB contaminated soil in the drainage swales surrounding the DRMO Salvage Yard. The work plan explains site characterization using multi-incremental sampling, and includes responses to review comments on the original work plan submitted in July 2005 and the revised draft plan of October 2006. Initial characterization sampling indicates relatively low levels of PCBs averaging about 50 mg/kg. We propose to start field work in March 2007 and complete the site characterization in about 3 weeks. The removal action schedule will be provided later this summer.

Although this is a final document, review comments may be sent to:

- a. Mr. Troy Imamura, COMNAVMARIANAS Environmental Office,
N454@guam.navy.mil
- b. Ms. Joann Mason, NAVFACENGCOM Marianas, Public Works,
joann.mason@navfacmar.navy.mil
- c. Mr. Richard Gaitley, NAVFACENGCOM Pacific, Environmental Restoration
Division, richard.gaitley@navy.mil

Alternatively, you may mail comments to Naval Facilities Engineering Command, Pacific, 258 Makalapa Drive, Suite 100, Attention: EV4RG, Pearl Harbor, HI 96860-3134.

Should you have any questions regarding this project, please contact Mr. Richard Gaitley at (808) 472-1444.

Sincerely,

Ser LEIGHTON G.M. WONG
Business Line Manager
