**SUBJECT: WASTE AT APRA HARBOR**

1. This message is a follow-up to calls placed to your office on 17 May 1996, to obtain the status of waste at Apra Harbor.
2. We have been directed by NAVSEA to produce the Historical Radiological Assessment for Apra Harbor, Guam. Since a portion of one section of this report addresses mixed waste, the disposition of the uranyl waste at Fena Lab needs to be included. I.E., has it been removed, and if so, when? If not, where is it being stored? This information needs to be entered at this time since the draft is being finalized.

Thanks again,

  
Charles Karelitz
